

STATEMENT OF COMPANY AIMS PRINCIPLES AND PRACTICE

Great British Guardians (GBG) is an experienced educational guardianship agency committed to providing the highest levels of pastoral and educational support to international students and their parents whilst at school in the UK. Our overriding aim is to enrich the lives and educational experience of all pupils in our care and to remove the associated worries and concerns for parents.

GBG retains overall responsibility for all students and we are available 24/7 in case of emergency. Depending upon the age and needs of individual student's, we may allocate them to an experienced host family to work with us and to accommodate them at the beginning and end of term, over exets, half terms and in emergency.

We are passionate champions of the young, recognising that a child's educational years are central in shaping their character and destiny. We add value by encouraging every student to fulfil their potential and are fully committed to safeguarding and promoting their welfare. When not at school, we ensure that students have a safe and happy home where they are encouraged to succeed, experience new skills and fulfil their potential. Everything we do is guided by the principle that a happy student is a successful student.

The interests, safety and wellbeing of all students in our care is our primary concern. This is true when dealing with parents, schools, agents, third party suppliers and host families.

We support the ethos and principles that AEGIS promote, which form the core of the services that we provide.

We expect all parties who we deal with to abide by our principles and we actively encourage such behaviour.
